

AI agent design canvas

One page for your team. Use it with the workshop guide, "Exploring AI in your work". A person plays the AI agent.

Team _____ Our task _____

Who plays the AI agent _____ **Scribe** _____

1 Pick one task

10 min

What happens today, and where does it get stuck?

What will you ask the AI agent to do?

What would better look like?

4 Say what the AI agent does

20 min

Steps the AI agent follows

Rules and policies it must apply

Write "If this happens, the AI agent does this". Say who confirms each rule.

Checks before it replies

5 Say what comes back

15 min

What the AI agent gives back

Who checks it before anyone uses it

What the AI agent may do without asking

6 What could go wrong

15 mi

Problem to try

What the AI agent says or does

Who acts next

What do you still need to find out, and who will find out?

7 Agree a small test

10 min

The test, and who leads it

How we will know it helped, and what would make us stop

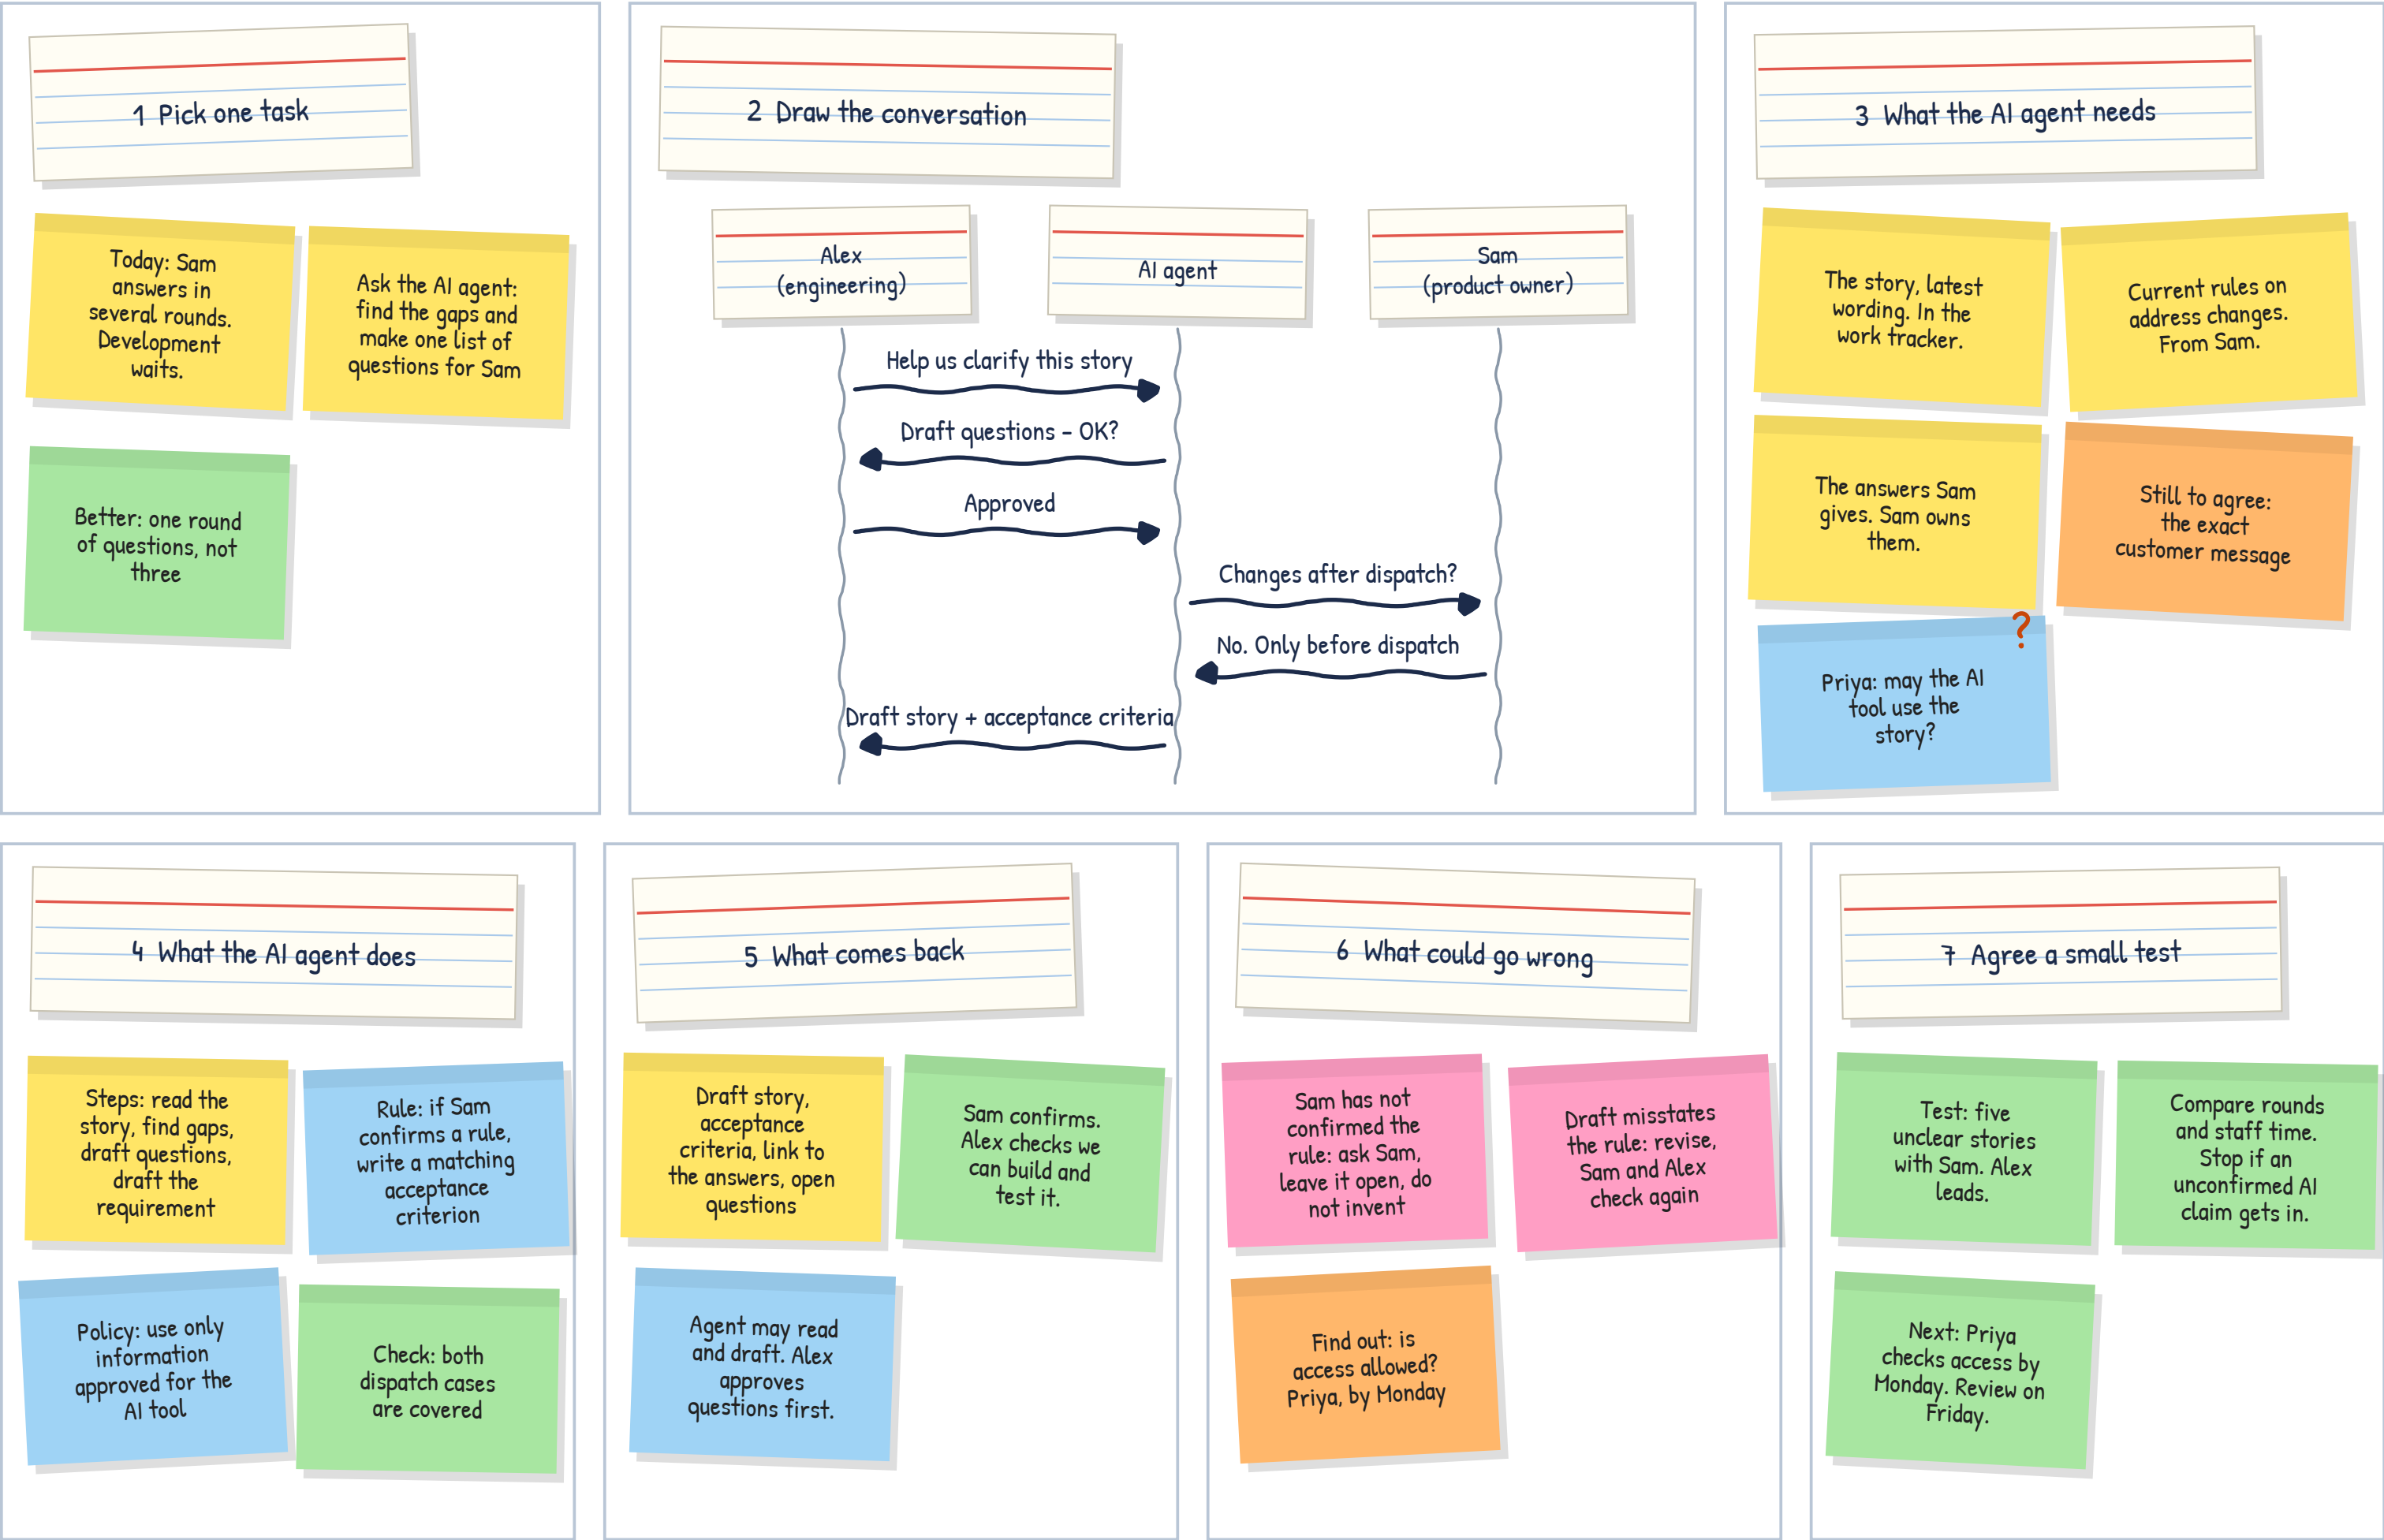

The next action, who does it and by when

If you do not know, write "We need to find out" and name someone who can help.

Example answers are in the workshop guide. Share your diagram and your test with the room.

Example: the canvas marked with index cards and completed with sticky notes

Task: clarify the story "Let customers change their delivery address"

Illustrative example, based on the worked example in the workshop guide. Index cards mark each box. Sticky notes carry the answers of the team.
